The Binder Questions

1. Explain how your team chose a Showcase project and what you hoped to learn, achieve, and/or discover.

We chose this particular establishment because of the fact that it revolved around the food industry, and since our project last year was also revolving around the topic of food, it made it relatively easy to construct a brand new website. As we basically used the same general ideas as last year, however with some improvements. We are hoping to learn from our errors from last year and apply new ideas that we have learned this year to make our website as good as it can possibly be. What we have discovered from our experience is that it is not as easy as it looks to construct a website from scratch, there are many levels to a quality website. It also made us appreciate all the web developers that are currently working to make exceptional websites throughout the world.

2. Summarize the steps taken to implement your project plan including preparation, research methods (ex. Internet, experiments, interviews), and execution.

The first step was to find a client for us to make a website for. Our original plan was to make a website for a paintball company in Miamisburg, however they declined the offer. So we moved on and found Sinfully-Gluten, who graciously allowed to make a site for their company. The next step was figuring out what the client preferred on the site. The majority of the website

was constructed with the clients preference in mind. To configure her new website, we set up appointments to go talk to her and ask what she would like to have in her website. Any idea that we would have to implement on the site would have to go through her. After that we created the mock up with the owner's approval. To begin coding we researched all of the necessary information that we would need to know in-order to complete the necessary tasks for creating the website. Throughout the coding process we informed the owner of the progress.

3. Discuss the outcomes of your project and the discoveries made while working as a team.

In my opinion I think the finished product is a definite improvement from last year. We learned from our mistakes and decided to try and finish early so we don't have to be all stressed out the day before the competition. Also we all learned that communication is key when working on a project like this. There isn't an I in team, it takes a group effort to fully complete this project. All in all it was a long and arduous project, but in the end of the day it was well worth because of all the lessons we learned throughout the journey and made the owner happy all while giving the company a good ROI (Return on Investment).

Project Planner

- **Project identification:** Include details about the project, including its name, description, ID, client, and project manager's name.

Name of Group: Team T.A.L.E

Name of the company: Sinfully Gluten Free

Description: Restaurant that provides the community with gluten-free products, that are affordable and delicious.

Client: co-owner of Sinfully Gluten-Free: Heather Zook

Project Manager's Name: Evan Difillippo

- **Project dates:** Identify the start and estimated end date of the project. You can also include a counter indicating the number of days left until the end date.

Start Date: August 15, 2018

135 Days left

End Date: March 6th, 2018

- **Progress:** Mention how much of the project has been completed so far in terms of milestones accomplished.

Project Charter: Completed

Communicate regularly with client

PHP Database:

- Admin login is up and running.
- Can add items from the menu.
- Table is made for food data to be stored.

HTML:

- Home page is completed

- Menu page is completed
- About us page is halfway through

Javascript:

- Slideshow is completed
- Map location is completed

CSS:

- Base of the CSS is more than halfway through
- Header and Footer CSS is completed, however the main body of the CSS is still in progress.
- **Tasks/activities/deliverables:** You can include a broad overview of key tasks, activities or deliverables, depending on the level of granularity. In complex projects, for instance, you might want to focus on deliverables, while in smaller projects, you can specify the exact tasks needed to produce said deliverables.
- Task 1: In the Database, we need to allow the Manager to delete any of the food that decides to add to the menu.
- Task 2: in CSS, we need to edit the sizing of the text and the pictures applied to the website.
- Task 3: Have enough meeting notes, and schedule out all the plans for everyone on the team.
- Task 4: Regularly meeting up with the client, to pick her brain on ideas to improve the website.
- Task 5: Background Styling, and other simple tweaks in the website to give a sleek, design, that is useful for all ages.
- **Task details:** Include details about each task start and end dates, the team or person responsible for it, and the task status.

Task 1: Person responsible: Evan

Task status: In progress, table is functioning, still have to work on the selection of the food, and deleting the food off the database.

Start Date:10/31/18

End Date: 11/14/18

Task 2: Person Responsible: Terrance

Task Status: Not started, but will start applying styles to text and pictures soon.

Start Date: 10/31/18

End Date: 11/7/18

Task 3: Person Responsible: Abraham

Task status: In progress, currently has 5 meeting notes, by the deadline hopes to have around 25-30 meeting notes

Start Date: 9/15/18

End Date: 2/6/19

Task 4: Person Responsible: Abraham

Task status: In progress, meeting up with her every 1 to 2 weeks for information.

Start Date: 9/15/18

End Date: 12/12/18

Task 5: Person Responsible: Terrance

Task status: Just Started, working on the base of the CSS.

Start Date: 10/29/18

End Date: 1/9/19.

Project Charter

Project Name:	Sinfully Gluten
Year:	2018
Date Prepared:	8/15/2018
Project Sponsor:	Sinfully Gluten-Free
Contact Information:	Phone: (937) 433-1044
Project Manager:	Abraham Dereje and Evan DiFilippo
Team Members:	Evan DiFilippo, Luis Avina, Abraham Dereje, Terrence Miller
Executive Summary:	<p>Include a high-level summary of the project, its purpose, and its stakeholders.</p> <p>Sinfully Gluten-Free is a small business in Centerville, Ohio whose purpose is to provide the community with a variety of delectable and affordable food for people who don't prefer or are intolerant towards food that contain gluten.</p> <p>The T.A.L.E. team is responsible for the integration of Sinfully Gluten-Free website. Our primary goal is to operate a fully-completed website that will help with the process of bringing in more revenue for the company and for us. It will be a useful experience that we can learn from the future.</p>
Project objectives:	<p>Explain the "why" of the purpose in greater detail. Be very specific about the outcomes you seek. It's a good idea to include specific numbers or at least a range. Don't say "increase traffic"; say "increase website traffic by 200% in 6 months".</p> <p>The T.A.L.E. team is seeking to increase overall traffic to the website by about 150% and customer satisfaction to at least 90% on the website.</p>

Business objectives:	<p>Use this section to describe how the project fits into the business' broader strategic goals. For instance, if you're running a campaign to increase traffic to a website, describe how the higher traffic would help the business in achieving its goals.</p> <p>The strategic goal is to reach people who had no idea about the website, increase traffic giving more options to those who don't prefer or are intolerant towards food that contain gluten.</p>
Project requirements:	<p>Explain the project's requirements in terms of resources - both tangible and intangible - at a high-level.</p> <p>The requirements of the project is to include HTML, CSS, JavaScript, and a working database. The intangible requirement is to have a sleek design that is functional.</p>
Project scope:	<p>Use this section to answer the question: "What is the project meant to accomplish?" Focus on both long and short-term goals & objectives, but briefly.</p> <p>The long term goal for this project allow for easy growth and development through the coming years by making the code easy and simple to read. The short term goal is to help improve the website traffic by 150%.</p>
Key deliverables:	<p>Briefly list the key deliverables at different milestones.</p> <p>2 weeks - Formulated plan/design of the website. 3-8 weeks - The majority of the website should be polished and ready for presentation. 9-11 weeks- Fine Tuning of the website, is necessary to make sure that our presentation is precise.</p>
Project schedule:	<p>Give a high-level overview of the project's estimated schedule. You don't have to be accurate down to the day, but a broad explanation of key milestones will help.</p> <ul style="list-style-type: none"> ● 2 weeks - Planning Period Completed ● 3-4 weeks - Backend of Database is in progress ● 5-6 weeks - Backend and Frontend of the Website is 85% done ● 7-8 weeks - Backend and Frontend of the Website is 100% done ● 9-10 weeks - testing project cautiously, and practicing the

	<p>presentation</p> <ul style="list-style-type: none"> 10-11 weeks - Any extra pieces are added if needed to improve the website.
Project budget:	<p>Give a high-level description of the project's budget. You can break this down by resource requirements if you want to go into more detail.</p> <p>Domain Name Registration \$11.99 Domain Name Renewal \$15.99 Domain Name Privacy \$14.88 Development of website \$0.00 Estimated total first year cost: 42.86 Estimated total yearly cost: 30.87</p>

Meeting Notes #1

Date: August 15th, 2018

Starting Time: 1:44 PM

Members present: Abraham, Luis, Terrance, and Evan

Meeting Notes:

Our first goal is set our team name we decided to use the team name TALE because that is the first letters of our names. Our first option for a client was originally gonna be a company called RUSH paintball. However, they politely declined our offer. We are currently searching for a new company in need of a professional website. It wasn't an ideal option anyways because of how far the business is for us which would reduce the amount of meetings making communication worse.

Jobs:

Abraham will help with database if needed by Evan and he will also mainly work on binder throughout the course of the project. Luis will do the HTML for the Home page, Menu page, Contact page, Review page, About us page, Admin login page, and Admin page. Terrance will do the CSS for the Home page, Menu page, Contact page, Review page, About us page, Admin login page, and Admin page. Evan will do the database which will allow the admin upload food items on the menu, allow for the collection and display of reviews, allow the admin to view user who want to contact them, and allow the admin to remove or delete food from the database.

Goals currently:

One of the biggest struggles last year was having a complete working database and our goal this year is to improve greatly data input and displaying such in the database. Another issue last year was communication between us as a group with having not nearly enough meetings and our goal this year is to have formal meetings at least once a month. Collectively our groups presentation was not as good as it could of been so another goal of ours this year was to give ourselves plenty of time to practice and make the presentation as good as it could possibly be.

2:26 meeting conclusion

Meeting Notes #2

Date: August 31st, 2018

Time: 2:05 PM

Members present: Luis, Terrance, Evan, Abraham

Goals of the meeting: Find a client, Contact the client, decide where to do mockup, Decide who does what

Abraham decides to send an email to a prospective client "Cork and Bottle"

Dear Cork-N-Bottle Manager,

My name is Abraham Dereje, a Senior from Centerville High School. My peers and I are in the Information Technology Class, and would love to make a one-hundred percent free website for your business. The website will be made by my group and it would not need to be used for your actual website. If you are interested please, contact me at the email address above.

Thank you for your time,

Abraham Dereje

Luis decides to send an email to three businesses "Spoonful", "3 dips", and "M Z pickles gourmet sandwiches"

Evan decides that he will converse with the owner of "Sinfully Gluten-Free" as she is a family friend

2:50 PM meeting conclusion

Meeting Notes #3

Date: September 17th, 2018

Time Started: 2:33 PM

Members Present: Abraham, Luis, Terrance, and Evan

Meeting Notes:

Company Name: **Sinfully Gluten Free**

Owner: **Heather**

Finally got a client to give us permission to make a website for them. Sinfully Gluten Free was a company that Evan suggested because the food was phenomenal, but the previous website they had is subpar at best , and we feel that we could improve it immensely. Also it seemed like a very interesting company, that stood out among others. In addition the previous website they had is subpar at best , and we feel that we could improve it immensely.

Today we are starting on the mock up for the website which give the layout and possible content for the website. We are debating on the main colors we want to have and what designs are necessary to make this website as good as it can possibly be. We are also starting on the database mockup early making sure that we don't have to rush for the future which was also a problem last year.

Goals Currently:

Continue perfecting the mock draft with our current page of Home, Menu, Contact, Review, About us, Admin login, and Admin page. Decide on the color scheme of the website. The consensus is red, black, and white. Get a head start on database by completing the database mock as soon as possible and start working on it.

Goals for next meeting:

Continue working on the mock up so we Luis and Terrance can begin coding the HTML and CSS. For Evan to continue the working on the database mockup and start on the database.

2:50 PM meeting conclusion

Meeting Notes #4

Date: September 21st, 2018

Starting Time: 2:11 PM

Members present: Abraham, Luis, Terrance, and Evan

Meeting Notes:

We are currently in the process of getting multiple steps done at the moment.

The Mockup, JavaScript, Database and Html are currently being worked on. The CSS will have to wait for the mock up to be completed.

We plan to meet up at Sinfully Gluten Free to discuss with the client what the mission of the company is, what makes them special from other competitors, and what they serve at the store.

In addition to this, we might ask her what colorway she would prefer and what specific functions she would like to add to our website. Also if she would allow us to take pictures of the store and the food for the website

Using this info, we can carve the website just to her liking, so everyone can enjoy the food at Sinfully Gluten Free.

Goals Currently:

Work on mock draft

Decide on the color scheme

Get a head start on Database

Meet with client to ask questions

Goals for next meeting:

Get information from client

Work on mock up, database, etc.

2:48 PM meeting conclusion

Meeting Notes #5

Date: October 30th, 2018

Starting Time: 2:29 PM

Members present: Abraham, Luis, and Evan

Meeting Notes:

What is Completed:

There is a good amount of objectives outside of the actual website that are completed like for example, the Project charter, the Mock Up, and the Planner. The process of storing food on the database is completed and the Admin page, Home page, and Menu page are completed, those were the easy ones to code, the hard part is going to be implementing a database into certain portions of the site. The header and the footer of the CSS is completed. However, it is still in the development phase as it is dependent on the completion of the HTML for it to be implemented.

What is still in progress

There are still four more HTML pages to be completed which are the Contact page, About Us page, Review, and Admin page. There have been some progress to the base of the CSS but that is still incomplete to this point. As apart of the Admin page the deleting foods portion still needs to be completed, but completion is close. The background styling with CSS is also currently in progress. We still need to receive the mission statement and social media information from the Sinfully Gluten-Free owner.

What we have done today:

- Project Planner is completed
- Slideshow completion of code

Plans for the future:

Go meet with the client and learn more about the business and ask her opinion on what her preferences are for the website and take pictures of the food and the store, so that we can utilize them for the slideshow.

2:46 PM meeting conclusion

Meeting Notes #6

Date: November 16th, 2018

Starting Time: 2:02 PM

Members present: Abraham, Luis, Terrance, and Evan

Meeting Notes:

Plan for the Weekend is to go visit the client, and to go ask her questions about the state of the website, focusing on her main opinions on the design. Currently, Luis and Terrance are working on the main portions of the websites which are the base CSS and the HTML page of Review and Admin page, while Evan is working on the Review on the Admin page allowing the admin to view the review and display the ones they select. Evan has completed storing the reviews into the database and include the user's name, email, rating, and the review itself. Abraham's been working on keeping the meetings notes up to date. Luis is currently trying to finish his About Us page for the website, to do this he will have to go talk to the Client for further information. Terrance is currently working really hard keep on track with his timeline for the CSS. Terrance has impressively formatted the Review and the Contact page. He also says he has to edit Luis' HTML because it needs improvement.

Goals For the Next Meeting:

Communicate better between each other with little meeting through texting or talking for ten minutes. Insert information from the client into the website. Finish up the database for the review allowing the admin to see the user's name, email, rating, and the review.

2:46 PM meeting conclusion

Meeting Notes #7

Date: January 15, 2018

Starting Time: 2:02 PM

Members present: Abraham, Luis, Terrance, and Evan

Meeting Notes:

Abraham consulted with the owner about the goal of the business in the community. The owner has also granted the team permission to come in and take photos of the store. Now it's up to us to decide what is necessary in the photos for the website. As for the HTML, nothing new has recently been done to them, however, Luis says the buttons could use some editing, possibly the use of some shadowing. However the main colors of the website are primarily white, black, and red. The box shadow that Luis is trying to implement into the website doesn't work out, we can revert back to a standard white for the buttons. Evan's database is corresponding to whatever edits Luis and Terrance make on the HTML and the CSS because of the implementation. It means that they are all going to have to communicate well for the website to operate accordingly from text and phone calls. In addition to that, the admin password now hashed, so now there is more security if a user somehow gets a hold of the database.

Goals for the next meeting:

Finishing the Contact database implementation with displaying the name, email, subject and message on the admin page. Also the Review database with displaying the rating and review content to the Review page. Photos are needed of the store to add to the slide show and about us page. The CSS needs to be completely polished and finished on the Admin Login and Admin Page

2:39 PM meeting conclusion

Meeting Notes #8

Date: March 9, 2019

Starting Time: 7:00 PM

Members present: Abraham, Luis, Terrance, and Evan

Meeting Notes:

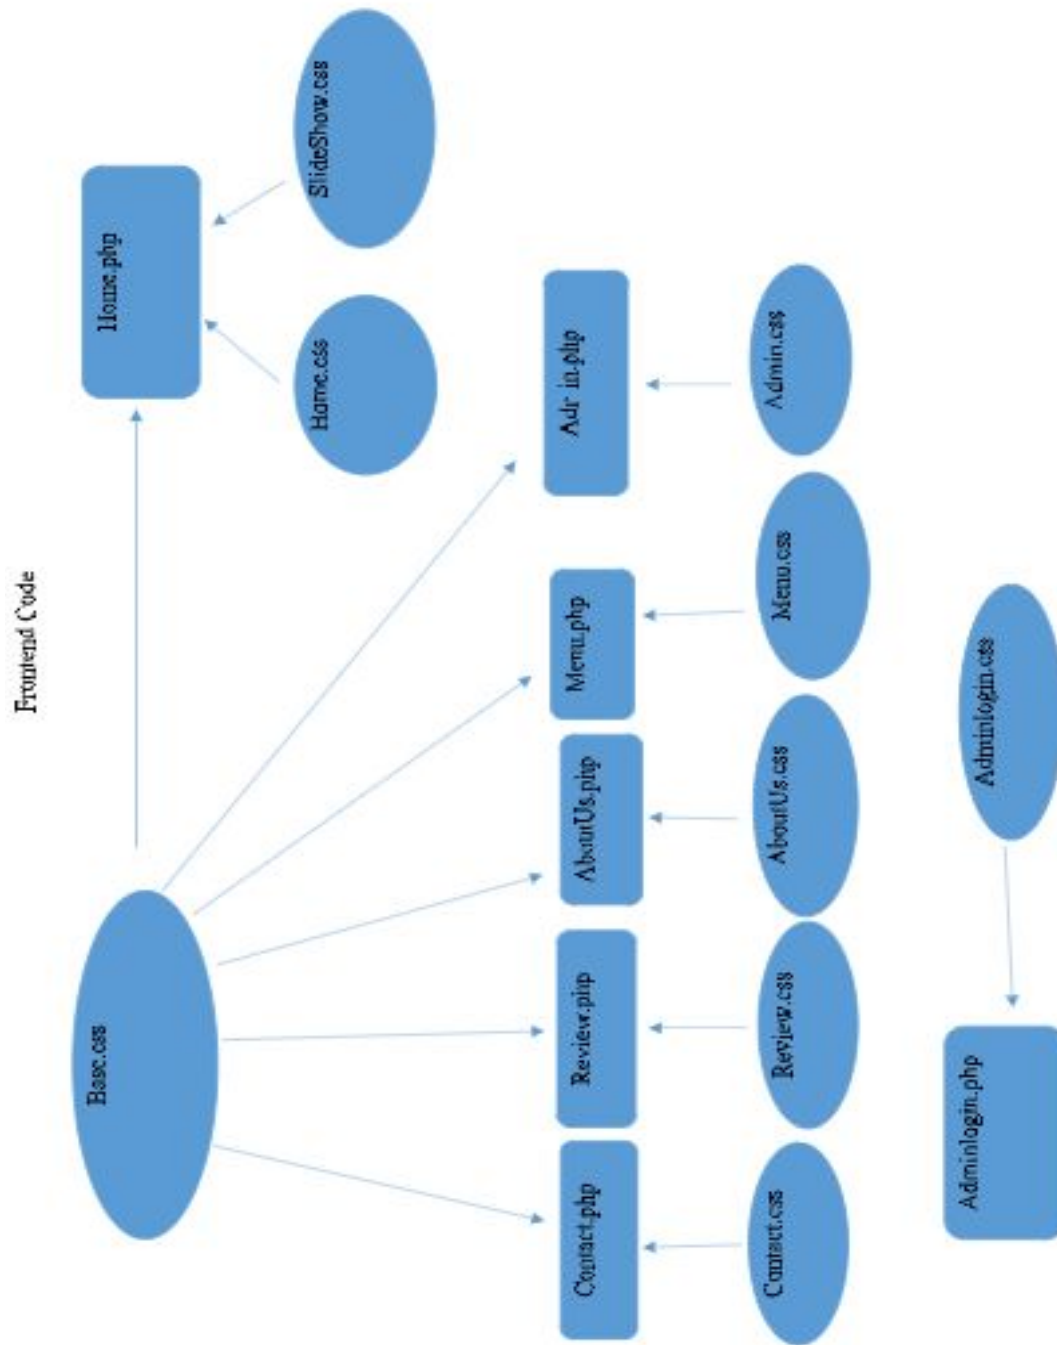

We have added all the necessary components to finish the website. All the photos have been included, all the databases have been completed aside from some tiny errors but those were easily fixed with clearing the cache. There were also some malfunctions with the shadowing as it overlapped with the logo on the home page. As a group decision we decided that it would be best to remove the box shadowing from the site. Other than that, we worked primarily on finishing the CSS, deciding what would look best with the HTML, for example the padding and if we should make the slideshow automatic or use arrows. Once the whole website was completed all there was to do was to record the video of the site working accordingly. It took a four attempts, but we finally finished recording with Terrance and Evan speaking. Now with all that completed the only thing left to do is to finish the binder and practice our presentation for the showcase which will take place next meeting.

Goals for the next meeting:

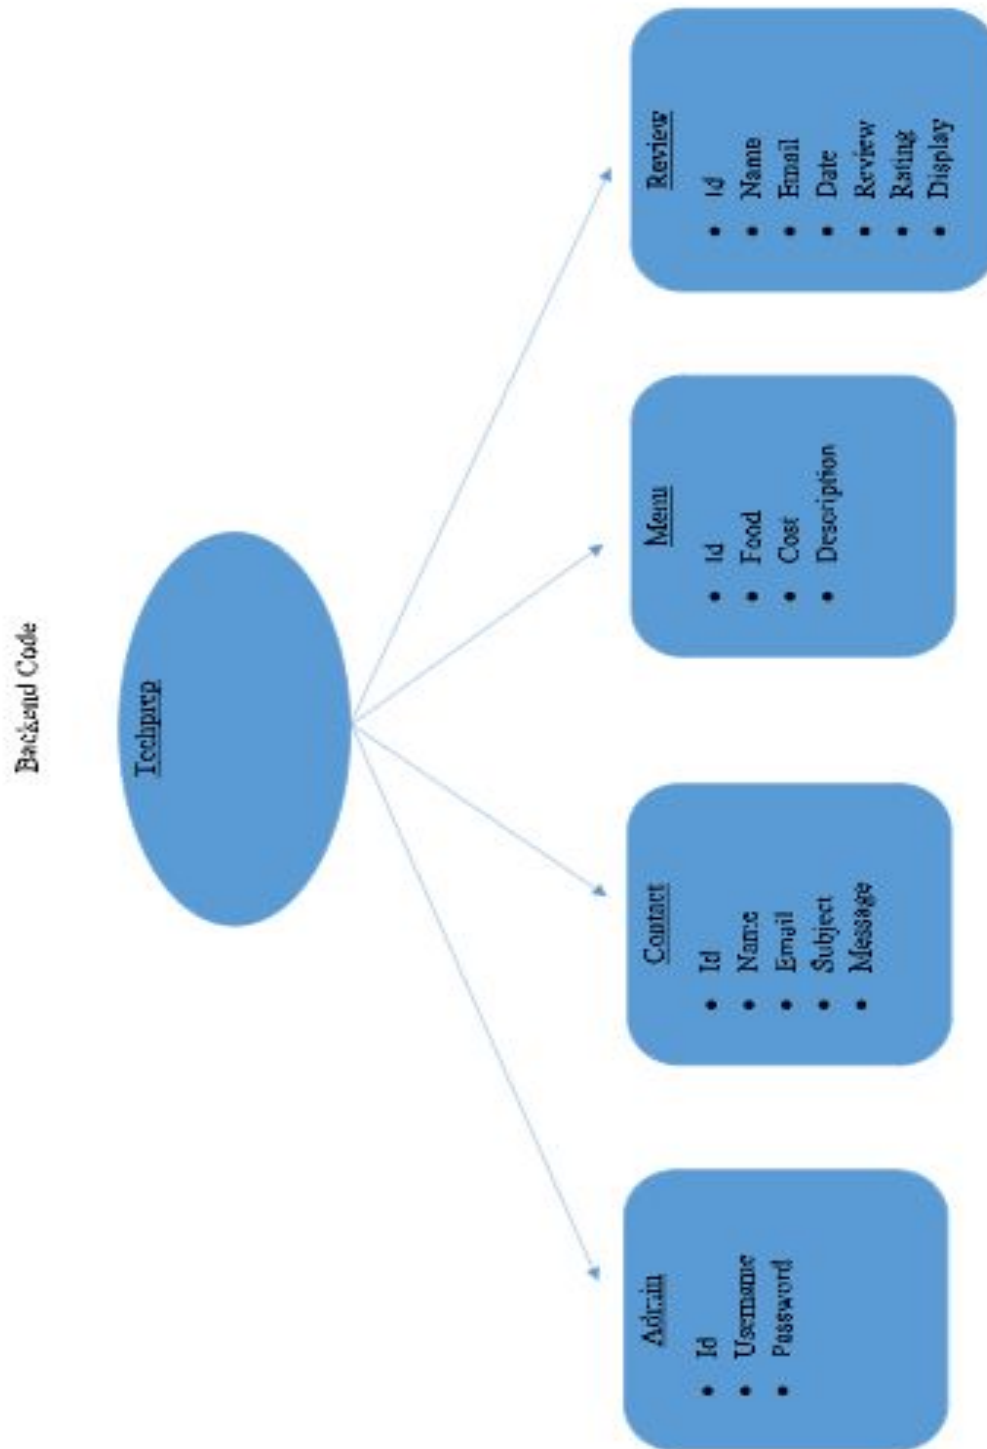

As a team practice the presentation to prevent error like running of time on saying um, like, basically and/or not knowing what the other person is going to say. Finish the binder which will contain meeting notes, code, flow charts, etc.

1:30 AM meeting conclusion

Mockup Menu Page

New Menu Page

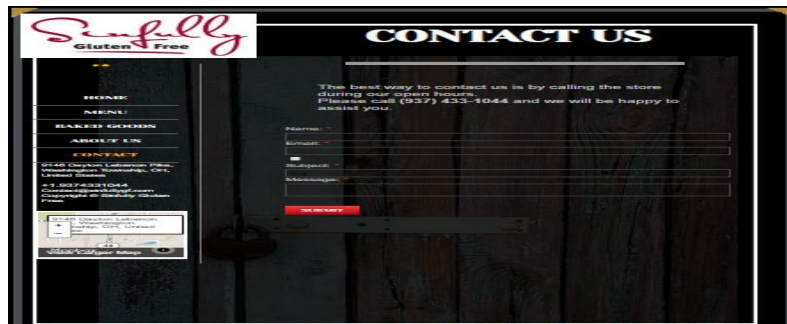

Mockup Review Page

Mockup of a review page. The browser address bar shows <http://troneque.com>. The navigation bar has links: Home, Menu, About Us, Reviews, and Contact. Below the navigation bar is a heading. There are three review examples, each with a placeholder text "Review Example". Below the examples is a form to write a new review. The form includes a label "Write your own review here:" and two input fields: "Name" and "Email Address". Below these is a "Review" label and another "Email Address" input field. A "Button" is located below the form. At the bottom of the page is a large rectangular box with the text "893x86".

New Review Page

New Review Page for Sinfully Gluten Free. The page features a logo at the top center. Below the logo is a navigation bar with links: Home, Menu, Reviews, Contact, and About Us. The main section is titled "Review". It contains two review examples, each with a star rating and a text box for the review. The first review has a 5-star rating and the text "Best food I have ever had and I will for sure be going back." The second review has a 5-star rating and the text "It was a cool experience for me." Below the reviews is a form to write a new review. The form includes a label "Rate your experience:" and several input fields: "Name (required)", "Email (required)", "Date of Visit (required)", "Tell us more about your experience!", and "Rate the overall service". A "3 out of 5" rating is shown below the form. At the bottom of the page are social media icons for Twitter and Facebook, and a footer with the text "Follow us on social media" and "©2014 Sinfully Gluten Free. All Rights Reserved. All Rights Reserved."
